Description

Marrying the old with the new, this kitchen was revitalized on a limited budget. The existing cabinetry was salvaged in the new design and complimenting cabinets were added to provide ample storage. The kitchen was opened up to the rest of the house, adding light and creating an open layout perfect for company. The new kitchen features stainless appliances, a glass mosaic tile backsplash, travertine tile floors and an abundance of functional quartz counter space. Modern luxury and perfect utility unite here.
